## **Mariner's Choice Signs Agreement to Represent Fire Protection Technologies      April 30, 2009**

**Jacksonville, FL – Mariner's Choice International Inc., (OTC: [MCII](#) - [News](#))** today announced that it has signed an agreement with Fire Protection Technologies, Inc. ([www.flammadur.com](http://www.flammadur.com)) to represent their patented Flammadur products in the shipbuilding, cruise ships, and offshore oil rig industries in North America.

Flammadur products are German technologies that have numerous approvals, including International Maritime Organization (IMO), Safety of Life at Sea (SOLAS), UL and Factory Mutual. They are attending the upcoming Offshore Technology Conference ([www.otcnet.org](http://www.otcnet.org)), an internationally renowned annual event taking place in Houston, Texas, May 4 – 7, 2009, where more than 70,000 attend from around the world, and over 2,000 companies exhibit.

This agreement is significant for Mariner's Choice, as it provides the opportunity to offer much sought after solutions to the on-going concerns of fire protection on ships and offshore oil rigs. In the Gulf of Mexico alone, there are more than 3,800 platforms. The fact that offshore platforms are totally self-contained, with some having as many as 2,500 people on-board, there are on-going inherent health, safety and environmental concerns.

"We are extremely pleased to have this opportunity to work with the Technical Director of Fire Protection Technologies, Dr. Adolf Hochstim, who is a highly acclaimed engineer with more than 30 years in scientific research, and has also acted as a consultant to NASA. The Flammadur products complement our line, and they meet the standard of excellence that we promote under our 'eco-safe solutions' seal," states Peter Hellwig, Vice President of Mariner's Choice.

### **About Mariner's Choice International Inc.**

Mariner's Choice provides high-performance, eco-safe recreational and industrial products utilizing leading-edge biodegradable technologies. Each product is tested to exacting standards and performance levels, with the goal of providing the greatest benefit and satisfaction to our recreational and industrial customers. Our "green" products, some of which employ nanotechnology, are a timely solution for the environmental and health concerns that affect people globally.
