

For Immediate Release

Mariner's Choice Gasoline Enhancer Receives EPA Registration

Jacksonville, FL, October 5, 2007 – Mariner's Choice International Inc. (Other OTC: MCII.PK) Mariner's Choice MC-Marine Gas #1 Extreme is a proprietary advanced technology that differentiates it from all other fuel additives.

The introduction of MC-Marine Gas #1 Extreme allows Mariner's Choice to enter into a multi-billion dollar fuel additive market. The science applied to this proprietary technology positions the product as a forerunner in the marine sector. Most fuel additives are made for automobiles, and do not address the issues that are inherent in boats and vessels. MC-Marine Gas #1 Extreme has been specifically formulated for boat engines that run under heavy loads, face moisture challenges, and various other conditions that are being affected by the changes in the fuel quality, such as oxygenation via the increasing use of ethanol. With consistent use of MC-Marine Gas #1 Extreme the benefits add up to substantial savings on fuel costs, engine maintenance, and most significantly, the environmental benefit of reduced emissions of as much as 80%.

MC-Marine Gas #1 Extreme contains active ingredients that provide the complex benefits, which require the product to be packaged in fluorinated HDPE (high density polyethylene) bottles, unlike other additives that are simply packaged in PVC. Gasoline is a circuitous mixture of components that need to be balanced, in order to give satisfactory engine performance, which MC-Marine Gas #1 Extreme provides. In addition, MC-Marine Gas #1 Extreme is a "combustible", which allows for easier shipping and safe storing, while others are "flammable" or "explosive". Mariner's Choice has already received interests from national and international organizations.

The MC-Marine Gas #1 Extreme is registered with the Environmental Protection Agency (EPA), under 40 CFR 79.23 212720003. To the best of the management's knowledge, there is no other marine fuel enhancer that has been registered with the EPA to date.

Mariner's Choice is a global leader in providing eco-safe solutions through leading edge biodegradable technologies. Its primary focus is to provide high performance solutions across all marine industry sectors – recreational and industrial – without compromising performance. Mariner's Choice products reduce the cost of ownership, operations, and maintenance of marine assets. Each product is tested to exacting standards and performance levels of excellence, while providing the greatest benefit and satisfaction to the recreational and industrial customer. Mariner's Choice "green" products and nano-technology is a timely response to the environmental and health concerns that affect people globally. (www.marinerschoice.net)

Forward-Looking Statements

Certain statements contained in the above, are forward-looking statements that involve risks and uncertainties. The statements contained herein that are not purely historical are forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements deal with the Company's current plans, intentions, beliefs and expectations and statements of future economic performance. Forward-looking statements involve known and unknown risks and uncertainties that may cause the Company's actual results in future periods to differ materially from what is currently anticipated. Factors that could cause or contribute to such differences include those discussed from time to time in reports filed by the Company with the Securities and Exchange Commission. The Company cannot guarantee its future results, levels of activity, performance or achievements.
