To whom it may concern:

I received your SUPER Wax & Polish. I have tried many waxes and polishes over the past several years, many of which I was satisfied with and many with which I have been disappointed.

I recently had AwlGrip applied to my custom thirty-one express, and was very hesitant to use many waxes that could potentially damage the new work. My ComMar sales rep provided me with your SUPER Wax & Polish and assured me that I would be satisfied with not just the ease of applying your product, but also with its superior performance.

To say the least ... I was indeed impressed. The blue hull has never looked so good. More importantly ... NO RESIDUE! Like your product says you can do, we used the product on every surface to include the all deck hardware and seating surfaces. Everything looks fantastic, bright, shiny, stays clean, and repels water like I've never seen.

I've rarely been so impressed. You really have a great product – more affordable and easier to use than most anything on the market. No buffing required! I'm looking forward to carrying your entire product line as part of our marine business.

Thank you again for making our boat look great (I've inserted a picture for you as well).

Yours truly,
