Dear Pete:

I am writing you this letter as a thank you for providing me with your new product Clean-N-Fresh. I would like to tell you of my experience with your great product.

As you may recall we met at the MAATS show in Vegas this past July. Prior to leaving for Vegas, I had hauled out my 37 foot Egg Harbor for its annual service (cleaning the bottom of the boat etc.). My boat has a freezer in its cockpit and I always keep bait in it (Bunker, squid, chum etc).

When the boat was hauled, I instructed the marina to be sure that it is connected to shore power so the freezer and fridge inside the boat will be on. A friend of mine, who is also a member of my crew, was going to keep an eye on things and also wax the boat while I was away in Vegas for nearly 10 days. Well, here comes the bad part.

The week that I was away, we had extreme heat here and my friend who is in air conditioning was too busy to check on the boat. It appears that the marina had lost power during that week and I lost power to my boat for several days, resulting in the freezer thawing out. According to the folks at the marina and my friend, the odor was such that it stunk up the whole area. Not only was the odor unbearable, but I ended up with maggots inside the cockpit cabinetry. My friend used all sorts of cleaners such as bleach, etc. and while he was able to get a little bit of the smell it was still there in a big way. Needless to say, I couldn't do anything about it while I was away.

As soon as I got back I called you and you sent me your Clean-N-Fresh. I sprayed the entire area with your odor-eater and over a day's period the odor was gone. I was relieved that I no longer had a boat with a terrible odor and maggots.

Just as an aside, a friend of mine was transporting gas for his boat (in 6 gallon cans) in his SUV, and spilled a considerable amount on the carpet. I gave him your bottle to use and once again it did the trick.

Pete, you have a great product and I thank you for sending it to me as fast as you did, as it solved my situation.

Thanks again

Dave Wygoda.
